Protect Precious Moment with

Dydrofy®

Composition

Dydrogesterone	IP	10 mg
Excipients		q.s.
Colour: Titanium Dioxide IP		

10mg

Tablets

Dosage Form : Film-coated oral tablet

IP-GRADE DYDROGESTERONE

STANDARD 10 MG FORMULATION

DESIGNED FOR PHYSICIAN-DIRECTED PROGESTERONE THERAPY

How It Works?

Dydrogesterone works by binding to progesterone receptors in the uterus, causing changes in the lining (endometrium) to support pregnancy or ensure a normal menstrual cycle. Unlike some other progestins, it generally does not inhibit ovulation at therapeutic doses.

1x10 Tablets
