Supporting Endothelial Function
& Microcirculation in Women

ArgiLuck™

L-Arginine + Proanthocyanidin Sachet

Composition
Each sachet of 5.5g contains :

L-Arginine IP	3g
Proanthocyanidin	75mg
Excipients	q.s.

Colour : Ponceau 4R

SUGAR FREE

10 Sachets

CRANBERRY
Flavour

ARGILUCK provides 3 g L-Arginine with antioxidant support to help optimize nitric oxide availability and uteroplacental perfusion.

ARGILUCK is designed as an adjunct nutritional therapy to support uteroplacental blood flow, endothelial health, and antioxidant balance in gynecological practice.

Rationale & Synergistic Mechanism

L-Arginine: Precursor of Nitric Oxide ® Improves vasodilation and blood flow.
Proanthocyanidin: Potent antioxidant ® Protects endothelium and stabilizes Nitric Oxide.
Net Effect: Improved endothelial function and microcirculation.

Gynecological Indications

- Impaired uteroplacental circulation
- High-risk pregnancy with endothelial dysfunction
- Recurrent pregnancy loss (vascular factors)
- Intrauterine growth restriction (IUGR) – Adjunctive Support

Dosage: As directed by the Physician.
